

RJ45 Keystone Jack

This keystone jack terminates network cables using Insulation Displacement Connectors (IDCs). It mounts in a wall plate or patch panel, offering a standardized connection point.

Overview

Professional Network Connectivity

This RJ45 Keystone Jack provides a reliable and standardized solution for terminating Ethernet network cables. Designed for modular integration, it features Insulation Displacement Connectors (IDCs) for efficient wire termination and includes a secure termination cap to ensure stable connections. It is an ideal component for mounting in wall plates or patch panels within professional networking environments.

Technical Details

Included Accessories

- Termination cap

Connector Type	RJ45
Termination Method	Insulation Displacement Connectors (IDC)
Mounting Compatibility	Wall Plate, Patch Panel
