

RJ45 Modular Crimping Tool

This professional-grade modular crimping tool is designed for terminating RJ45 connectors on Ethernet cables. It features a built-in cable cutter and stripper for convenient cable preparation.

Product Overview

Professional RJ45 Crimping Tool

This professional-grade modular crimping tool is specifically engineered for the reliable termination of RJ45 connectors on Ethernet cables. Featuring an integrated design, it combines cutting, stripping, and crimping capabilities into a single, efficient device. The ergonomic handle design ensures consistent leverage and operator comfort during high-volume network installation tasks.

Technical Specifications

Integrated Functions

- Crimping mechanism
- Cable cutter
- Cable stripper

Connector Compatibility	RJ45
Country of Origin	Taiwan
