Product Overview

Professional Road Breaking Solution

This small road breaking equipment is engineered for high efficiency in road construction and demolition tasks. Designed with a focus on strong performance, it serves as an ideal solution for breaking up concrete, asphalt, and rock surfaces. Its robust build quality ensures reliable operation in demanding environments, including opencast mining applications.

Performance & Application

Key Features

- Efficient breaking mechanism
- Strong motivation for heavy-duty tasks
- Ergonomic design to minimize operator fatigue
- Durable construction for long service life

Applications

Road Construction, Demolition, Opencast Mining

Technical Specifications

Model Identifier

26
