

Road Construction Compactor

This heavy-duty construction machinery is designed for road compaction and soil stabilization. It features a robust steel drum roller, enclosed cabin with windshield wipers for operator comfort and visibility, and a powerful engine for efficient performance.

Product Overview

Heavy-Duty Road Compactor

This robust road construction compactor is engineered for demanding site preparation and soil stabilization tasks. Featuring a durable steel drum roller and a high-performance engine, it ensures consistent compaction results across various terrains. The operator-focused design includes an enclosed cabin with windshield wipers, providing excellent visibility and comfort for long shifts in diverse weather conditions.

Key Performance Metrics

Primary Application

1 Ready

Road Construction

1 Ready

Soil Stabilization

Design & Features

Equipment Category

Construction Machinery • Heavy-Duty • Road Compactor

Operator Station

- Enclosed cabin
- Windshield wipers
- High-visibility design

Core Components

Steel drum roller, High-performance engine
