

Road Milling Bit with Tungsten Carbide Tip

Road milling picks are designed for removing asphalt and concrete. These picks feature a durable construction and a tungsten carbide tip for wear resistance and efficient cutting.

Product Overview

High-Performance Road Milling Solutions

These professional-grade road milling picks are engineered for superior performance in demanding infrastructure projects. Utilizing advanced manufacturing technology and premium raw materials, these tools deliver high abrasive and impact resistance during concrete and asphalt removal. Their robust design ensures an extended service life and optimized work efficiency for road maintenance and cold regeneration applications.

Technical Specifications

Tip Material	Tungsten Carbide
Primary Applications	Asphalt Pavement, Concrete Pavement, Cold Regeneration

Performance Features

Key Performance Indicators

- High abrasive resistance
- High impact resistance
- Long service life
- High work efficiency
