

Road Racing Bicycle Frame

This high-performance bicycle frame is designed for road racing. It features lightweight construction with advanced carbon fiber layup for optimal stiffness and compliance.

Overview

High-Performance Road Racing Frame

This advanced road racing bicycle frame is engineered for elite performance, utilizing a sophisticated carbon fiber layup to achieve an optimal balance of stiffness and rider comfort. Its aerodynamic tube profiles are meticulously designed to minimize drag, significantly enhancing speed and overall riding efficiency. The integration of internal cable routing ensures a sleek, professional aesthetic while further optimizing airflow for competitive cyclists.

Technical Specifications

Key Features

- Aerodynamic tube shaping
- Integrated cable routing
- High-stiffness carbon layup

Frame Material	Carbon Fiber
Groupset Compatibility	Electronic Groupsets, Mechanical Groupsets

General Information

Model Indicators

LIBHURNG • TRACKER • CARBON
