

Road Racing Bicycle with Shimano Drive-train

This road bicycle is designed for speed and efficiency. It features a lightweight frame and a Shimano drivetrain for smooth and reliable gear changes.

Overview

High-Performance Road Racing Bicycle

This 700C road racing bicycle is engineered for speed and efficiency on paved surfaces. Featuring a lightweight alloy frame and a reliable 16-speed Shimano drivetrain, it offers responsive handling and smooth gear transitions for fitness training and road cycling. The aerodynamic design and narrow tires help minimize rolling resistance, supporting an efficient riding posture for extended rides.

Frame & Geometry

Frame Material	700C Alloy
Frame Size	19.4 inch

Drivetrain

Derailleurs

Component	Model
Front Derailleur	Shimano FD440
Rear Derailleur	Shimano RD2300

Crankset

39 T Inner Chainring	52 T Outer Chainring
--------------------------------	--------------------------------

Shifter	Shimano SL440
Total Speeds	16

Components

Wheelset Details

- Double Wall Rims
- 32H Spoke Count
- Quando Alloy/Steel QR Hubs
- Kenda 700x25C Tires

Cockpit

- 3D Forged #6061 Alloy Stem
- 600mm Alloy Handlebar

Braking System	Promax MV-85 Alloy V-brake
