Product Overview

Versatile Road Safety Solutions

This premium grade polyethylene traffic cone is engineered for high visibility and long-term durability in diverse environments. Designed for the European market, it features a stackable, lightweight construction with a stable black base, making it ideal for municipalities, construction sites, and emergency management. Its UV-resistant formula ensures the vibrant fluorescent orange finish remains effective against fading and aging, providing consistent safety and hazard marking.

Technical Specifications

Material	Premium Grade Polyethylene (PE)
Design Features	UV-resistant, Stackable, Fluorescent Finish, Reflective
Base Configuration	Black base for added stability

Applications

Recommended Industries

- Emergency Response
- Municipalities
- Construction Sites
- Parking Lot Management
- Utility & Tow Truck Operations
