Product Overview

Professional Road Sweeper Brush Segment

This high-performance brush segment is engineered for heavy-duty road sweeping applications, utilizing a unique high-density punch arrangement for superior cleaning efficiency. Constructed with durable PA nylon bristles, the brush offers excellent resistance to wear, corrosion, and bending, ensuring a long service life even in demanding environments. Designed for versatility, the segment features adjustable, flexible operation and is compatible with various road maintenance vehicles, including trucks, skid steer loaders, and tractors.

Technical Specifications

Bristle Material	PA Nylon
Key Performance Traits	Wear-resistant, Corrosion-resistant, High-density punch, Flexible

Operational Capabilities

Equipment Compatibility

- Trucks
- Skid steer loaders
- Large tractors
- Snow removal attachments

Operational Advantages

- Automatic pavement cross-slope adjustment
- Flexible cab-controlled operation
- High stability support wheels
- Quick-link installation and removal
