

Road Sweeper Vehicle

This specialized vehicle is designed for cleaning streets and other paved surfaces. It is equipped with rotating brushes underneath to sweep debris and a large collection container.

Overview

Professional Road Sweeper

This specialized road sweeper vehicle is engineered for efficient cleaning of municipal streets and paved industrial surfaces. It features a robust chassis with a cab-over engine design to ensure maneuverability in urban environments. The unit includes advanced rotating brushes for debris collection and a high-capacity rear-mounted container for effective waste management.
