Overview

Professional Road Sweeping Solution

This specialized road sweeping truck is engineered for efficient municipal, industrial, and construction site maintenance. It features a robust chassis paired with a high-performance vacuum and rotating brush system to ensure thorough cleaning of dust and debris. With an integrated water spraying mechanism to suppress dust and a high-capacity hopper, this vehicle provides a reliable and environmentally conscious solution for urban sanitation.

Technical Specifications

Ideal Use Cases

- Municipal road cleaning
- Construction site maintenance
- Industrial area sanitation
- Urban street maintenance

Cleaning Mechanism

Rotating Brushes, Vacuum System, Water Spraying System

Performance

Key Operational Benefits

Dust Suppression • High Capacity Hopper • Ergonomic Design • User-Friendly Controls
