

Road Sweeping Truck

This specialized vehicle is designed for cleaning streets and other surfaces. It uses rotating brushes to collect dirt and debris into a large tank.

Product Overview

Professional Road Sweeping Solution

The QDT5050TSL Road Sweeping Truck is a specialized vehicle engineered for efficient surface sanitation and debris removal. Equipped with precision rotating brushes mounted under the chassis, it systematically collects dirt and road refuse into a high-capacity onboard tank. This vehicle offers a robust solution for municipal cleaning, construction site maintenance, and large-scale facility management.
