

Roadside Landscape Median with Decorative Plants

A well-maintained asphalt road features a central green median adorned with decorative plants. Grassy areas slope upwards on either side, complemented by streetlights and trees.

Product Overview

Roadside Landscape Solution

This roadside landscape median is designed to enhance urban and suburban infrastructure through organized, aesthetically pleasing greenery. Featuring integrated decorative plants, it serves as a functional divider for multi-lane roads while contributing to environmental beautification. The design promotes organized traffic flow and improves the visual quality of roadside environments.
