

Robot Vacuum Cleaner for Carpet and Tile

This robot vacuum cleaner efficiently removes dirt, debris, and pet hair from carpets and hard floors. It features a compact design for cleaning under furniture and includes sensors for obstacle avoidance and drop prevention.

Product Overview

Professional Cleaning Performance

This advanced robot vacuum is engineered for comprehensive cleaning on both carpets and hard floors. It features an intelligent multi-brush system, integrated UV sterilization for health-conscious maintenance, and autonomous navigation for effortless home coverage. With its ultra-low 8.7cm profile and smart features like auto-charging and cliff detection, it offers a seamless cleaning solution for professional and residential environments.
