

Robotic Swimming Pool Cleaner

This automatic pool cleaner features a dual-body design with independent tracks for enhanced maneuverability. It is equipped with scrubbing brushes to remove dirt and debris from pool surfaces, providing hands-free cleaning.

Product Overview

Autonomous Pool Maintenance Solution

This automatic swimming pool cleaner is engineered for high-efficiency, hands-free maintenance, ensuring a thorough cleaning of your pool surfaces. Featuring a dual-body design with independent tracks, the unit offers superior maneuverability and seamless obstacle avoidance. It utilizes powerful integrated scrubbing brushes to effectively dislodge and remove persistent dirt, debris, and algae from the pool floor and walls.

Key Features

Operational Advantages

- Hands-free automated cleaning
- Enhanced maneuverability around obstacles
- Reduced maintenance time for pool owners
- Compatibility with various pool shapes and sizes

Cleaning Technology

Autonomous Operation, Independent Track Propulsion, Scrubbing Brush System
