

Robotic Swimming Pool Cleaner

This automatic cleaner is a robotic device designed for the efficient and thorough cleaning of residential swimming pools. It features a powerful suction motor and scrubbing brushes to remove dirt, debris, and algae from pool floors, walls, and waterline.

Overview

Intelligent Pool Maintenance

This robotic swimming pool cleaner is engineered for efficient and thorough maintenance of residential pools. Utilizing a powerful suction motor and integrated scrubbing brushes, it effectively removes dirt, debris, and algae from floors, walls, and the waterline. Its intelligent navigation system ensures complete coverage while avoiding obstacles, and the self-contained filtration system captures fine particles for crystal clear water.

Performance & Features

Cleaning Coverage

- Pool Floors
- Pool Walls
- Waterline

Compatible Surfaces

Concrete, Vinyl, Fiberglass

Navigation System

Intelligent automated navigation

Operation

Operational Mode

Plug-and-Play • User-Friendly
