

Robotic Vacuum Cleaner

This robotic vacuum cleaner is designed for automated floor cleaning. It is equipped with sensors for navigation and obstacle avoidance, ensuring efficient cleaning.

Product Overview

Automated Cleaning Solution

This robotic vacuum cleaner features a reliable disk-shaped design engineered for efficient floor maintenance. Equipped with advanced cliff and anti-falling sensors, it safely navigates various surfaces while avoiding obstacles automatically. It provides a comprehensive sweeping function, making it an ideal choice for maintaining cleanliness in professional or residential environments.

Technical Specifications

Operating Voltage

14.4 V

Voltage

Power Rating

25 W

Battery Capacity

800 MAH

Battery Type

Ni-HM

Cleaning Features

Cleaning Tools

- Lateral brushes
- Main brush

Integrated Sensors

Cliff Sensors, Anti-falling Sensors, Obstacle Avoidance

Design and Build

Shape

Disk

Surface Finish

Spray
