Product Overview

Automated Cleaning Solution

This robotic vacuum cleaner provides a comprehensive solution for automated floor maintenance in both residential and commercial settings. Featuring a versatile design, it combines vacuuming capabilities with mopping functionality to ensure thorough debris removal and surface cleaning. Its compact, circular chassis is engineered to navigate under furniture and reach difficult areas efficiently.

Design & Build

Chassis Design	Circular, compact design for low-profile cleaning
Finish	Sleek black finish with metallic accents

Cleaning Capabilities

Brush System

- Rotating side brush
- Main roller brush

Cleaning Modes	Vacuuming, Edge Cleaning, Mopping
----------------	-----------------------------------

Technology & Sensors

Navigation Technology

Obstacle Avoidance • Sensor-Guided Navigation

Control Interface	Centralized physical control button
-------------------	-------------------------------------
