Overview

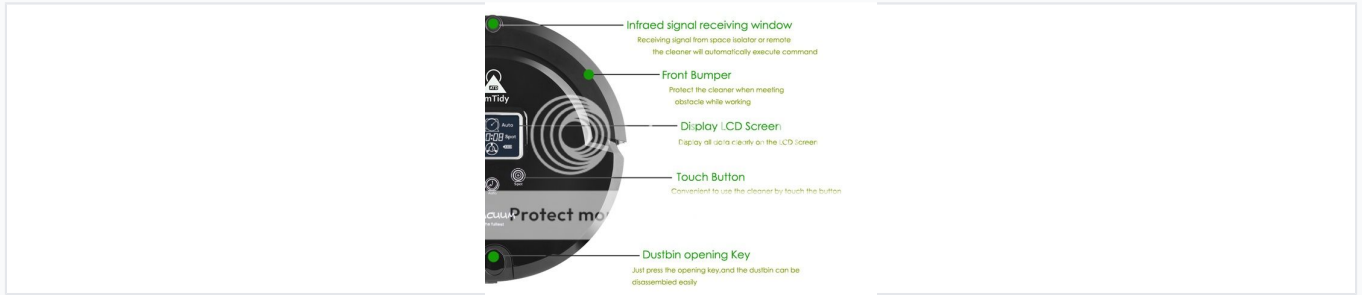

Compact 8.7cm profile designed to reach under furniture with intuitive display controls.

Intelligent Robotic Cleaning

This advanced robotic vacuum cleaner offers a hands-free solution for maintaining clean floors, capable of sweeping, vacuuming, dry mopping, and sterilizing surfaces. Designed with a low-profile 8.7cm height, it navigates easily under furniture while utilizing intelligent sensors to avoid obstacles, stairs, and tangles. Featuring on-board scheduling for up to seven sessions a week, the device automatically manages its own charging and provides a comprehensive cleaning solution for homes and offices.

Performance

User-friendly touch interface with clear LCD display for monitoring and scheduling.
