Product Overview

Overview of 9 major intelligent functions and operational features.

High-Efficiency Robotic Cleaning

This advanced robotic window cleaner is engineered for high-altitude maintenance and smooth surface cleaning. Utilizing smart chip technology and intelligent AI navigation, it achieves 98% coverage with optimized cleaning paths. Designed for both residential and commercial use, it provides a safe, hands-free solution for hard-to-reach areas.

Technical Performance

Cleaning Coverage	98 %
Navigation Modes	U-shaped, Z-shaped, 4+2 Composite
Emergency Battery Life	30 min

Safety & Features

Built-in Safety Measures

- Safety rope
- Power-off backup battery
- Edge/obstacle detection
- Falling prevention
- Hanging air leakage detection

Versatility

Compatible Surfaces

Glass • Tables • Glass Doors • Tiles • Marble

Operation Methods

- One-click start
- 2.4G wireless remote
