

Rock Bolt Hardware Kit

This kit provides essential hardware for rock bolt support systems. It includes a variety of nuts, washers, bolts, and rods designed for secure and reliable road support in underground tunneling and mining environments.

Product Overview

Professional Mining & Tunneling Support

This comprehensive rock bolt hardware kit is engineered for high-performance ground support in demanding underground tunneling and mining environments. The collection includes essential components such as dome nuts, spherical washers, and threaded rods designed to ensure structural integrity. With over 16 years of field-proven reliability, these fasteners provide consistent security for road support applications.

Technical Specifications

Components List

- Spherical seat nuts
- Dome ball washers
- Hex nuts
- Flange nuts
- Cable barrels
- Eye bolts
- Scaling bars
- Couplers
- Chisels
- Friction bolt rings
- Pull collars

Quality Standards

Mining Grade, Tunneling Certified, High-Strength
