

Rock Drilling Anchor Bar Coupler

This high-strength steel coupler is designed for rock drilling and piling applications. It ensures secure and reliable connections in demanding construction environments.

Overview

High-Performance Rock Drilling Components

This professional-grade rock drilling anchor bar system is engineered for demanding construction, mining, and geotechnical engineering projects. The assembly includes high-strength steel couplers, nuts, plates, and a variety of drill bits designed to ensure secure connections and efficient power transmission. With options ranging from R25 to T127, this versatile system minimizes downtime and provides reliability in complex drilling environments.

Technical Specifications

Available Bar Types

- R25
- R32
- R38
- R51
- R63
- R76
- T30
- T40
- T52
- T73
- T76
- T103
- T111
- T127

System Components

Coupler, Nut, Drill Bit, Plate, Anchor Bar

Drilling Accessories

Drill Bit Configurations

Material	Configuration
Carbide	Cross Cut Bit
Carbide	Button Bit
Steel	Cross Cut Bit
Steel	Button Bit
General	Clay Sand Bit
