Product Overview

High-Efficiency Panel Manufacturing

This automated production line is engineered for the high-volume manufacturing of rock wool sandwich panels. The system integrates precise material feeding, adhesive application, core insertion, and panel pressing to ensure consistent quality and structural integrity. Designed for industrial efficiency, it provides a cost-effective solution for creating energy-efficient building components.

Technical Capabilities

Key Panel Properties

Thermal Insulation • Acoustic Insulation • Fire Resistance • Structural Stability • Lightweight

Compatible Core Materials

Rock Wool, EPS, Glass Wool

Application

Primary Use Cases

- Industrial Factory Walls and Roofs
- Warehouses and Garages
- Cold Storage Facilities
- Commercial Gymnasiums and Exhibition Centers
- Theatres and Cinemas
- Movable Houses
- Civil Construction
