Product Overview

Industrial Roll Paper Die Cutting and Stripping Solution

This high-performance roll paper die cutting and stripping machine is engineered for the efficient, large-scale production of paper box blanks. It integrates automatic feeding, precise die-cutting, and automated waste stripping into a single streamlined process. Built with a heavy-duty frame for stability and longevity, the machine is an ideal solution for industrial settings requiring reliable, high-speed box manufacturing.

Certifications & Quality

Certifications

CE Certified

Technical Features

Core Systems

- Automatic paper roll feeding system
- Precision die-cutting mechanism
- Integrated waste stripping unit
- Conveyor belt material handling system
- Adjustable cutting and stripping force controls

Operational Safety

Safety Equipment

- Emergency stop buttons
- Protective safety guards
- Roller system safety striping
