

Roller Chain Sprocket

This roller chain sprocket is made from C45 material. It is designed for optimal power transmission and durability in demanding industrial applications.

Product Overview

Industrial Roller Chain Sprocket

This precision-engineered roller chain sprocket is designed for reliable power transmission in demanding industrial applications. Constructed from high-quality C45 material, it features hardened teeth for extended service life and consistent performance. This 40B30 model is compatible with standard roller chains, making it an ideal choice for conveyors and heavy-duty mechanical systems.

Technical Specifications

Material	C45
Model Series	40B
Specification ID	40B30

Logistics

Estimated Lead Time	45 days
Packaging Type	Export standard packaging

Manufacturing Details

Surface Treatment
None
