Overview

High-Performance Roller Top Conveyor Belt

This modular plastic conveyor belt is specifically engineered for efficient sorting and material handling applications. Designed for reliability, it offers a maintenance-free operation with a lifespan significantly longer than traditional belts. Its hygienic design and food-safe material options make it an ideal choice for both food processing and industrial manufacturing environments.

Technical Specifications

Dimensions

80.8 mm

Pitch

19 mm

Thickness

258 mm

Minimum Width

7 mm

Rod Diameter

Standards & Approvals

FDA • EU

Material Composition

PP, POM, PE, PA

Working Temperature

-40°C to 260°C

Open Area

3 %

Max Load Capacity

1.2 tons/square meter

Configuration

Sprocket Compatibility

- 6T
- 8T
- 10T
- 12T
- 16T
- 17T
- 8T-Split
- Square bore
- Round bore

Available Colors

White, Blue, Gray, Nature, Dark-brown

Applications

Suitable Industries

Sector	Applications
Food Industry	Meat, Poultry, Seafood, Bakery, Snacks, Produce
Non-Food Industry	Automotive, Packaging, Printing, Postal, Cardboard, PET
