

Roller Wheel Mounting Bracket

This mounting bracket is designed with a roller wheel assembly attached to the top. It is suitable for sliding or rolling applications within furniture, machinery, or mechanical systems.

Product Overview

High-Performance Mounting Solution

This black rectangular mounting bracket integrates a precision roller wheel assembly designed for smooth operation in industrial or mechanical sliding applications. Featuring a robust four-hole mounting pattern, it ensures stable and secure installation. The design is optimized for versatility, making it suitable for high-demand furniture, heavy-duty shelving, or modular machinery systems.

Technical Specifications

Mounting Pattern	4-hole square pattern
Surface Finish	Black powder-coated, Corrosion resistant
Central Fastener	Hexagonal nut

Application

Suitable Applications

- Sliding door mechanisms
- Furniture tracks
- Mechanical guide systems
- Industrial shelving
