

Roof and Gutter De-Icing Heating Cable

This cable prevents ice dam formation, stopping costly ice damage. It promotes water flow through gutters and downspouts.

Product Overview

Prevent Costly Ice Damage

This pre-assembled roof and gutter de-icing cable is designed to prevent ice dam formation by promoting the free flow of water through gutters and downspouts. It is built with a robust, weather-resistant construction featuring an XLPE inner insulation and a continuous ground braid for safety. The system is ready to install out of the box, providing a long-term, low-maintenance solution to protect your roof and drainage systems throughout the winter season.

Technical Specifications

Approvals & Standards

CE • UKCA • EAC

Power Density	17W/m, 30W/m
Voltage Rating	110-120V, 208-240V
Cable Dimensions	7mm x 4.2mm

Key Features

Included Components

- De-icing Cable
- Shingle Clips
- Cable Spacers
- Installation Instructions
- Electrical Panel Labels
