

Rooftop Solar Power Generation System

171.32kWp

This rooftop solar power generation system has a capacity of 171.32kWp. It utilizes photovoltaic panels to convert sunlight into electricity.

System Overview

High-Capacity Solar Power Generation

This professional-grade solar power generation system offers a robust capacity of 171.32 kWp, designed for efficient on-site energy production. Installed in Fullen, Germany, the system utilizes high-performance CS6A module technology to convert sunlight into reliable electrical power. Completed in June 2005, this installation provides a proven solution for reducing dependency on grid electricity and lowering operational carbon footprints.

Technical Specifications

System Size

171.32 kWp
Total Capacity

Module Type

CS6A

Project Details

Location

Fullen, Germany

Completion Date

June 2005
