

# Room Cooler AC Motor

This high-efficiency electric motor is designed for room cooler applications. It features a robust construction with color-coded wires for easy electrical connection to air conditioning and ventilation equipment.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Air Ventilation Motor

This robust electric motor is precision-engineered for reliable performance in room coolers and ventilation equipment. Designed with a durable housing and a threaded shaft, it ensures seamless integration with fans and impellers. The unit is built for safety and longevity, featuring high-temperature resistance and standardized wiring for straightforward installation in diverse air conditioning systems.

## Technical Specifications

Voltage Rating	600 V
Maximum Temperature	125 °C
Wire Gauge	20AWG

## Electrical Interface

Connection Color Coding	Red, Yellow, Blue, Gray
-------------------------	-------------------------

## Key Features

### Construction Highlights

- Robust white housing
- Threaded metal shaft
- High-efficiency operation
- Versatile ventilation compatibility

## Application Suitability

### Compatible Equipment

Room Coolers • Air Conditioners • Ventilation Systems
