

Rotary Bottle Filling Machine

This automated rotary filling machine is designed for high-speed packaging applications. It features a stainless steel construction, rotary indexing system, multiple filling heads, and an integrated conveyor system.

Overview

High-Efficiency Rotary Filling Solution

This automated rotary filling machine is engineered for high-speed industrial packaging applications. Featuring a robust stainless steel construction and a precise rotary indexing system, it ensures reliable bottle handling and consistent volume dispensing. Designed for continuous operation, this versatile system is suitable for a wide range of liquids, powders, and granular products.

Technical Specifications

Key Features

- Rotary indexing system
- Multiple filling heads
- Integrated conveyor system
- High-speed operation

Construction Material	Stainless Steel
Product Compatibility	Liquids, Powders, Granular Products
