

Rotary Compressor for Air Conditioners

This rotary compressor is designed for air conditioning applications. It is hermetically sealed and provides efficient and quiet operation.

Product Overview

High-Efficiency Rotary Compressor

This hermetically sealed rotary compressor is engineered for high-performance air conditioning applications. Featuring a compact, robust design with an integrated accumulator, it ensures reliable and quiet operation across diverse residential and commercial environments. The unit supports versatile operating conditions, including 50Hz, 60Hz, and Inverter-driven systems, providing flexibility for global market requirements.

Technical Specifications

Technology Type

Inverter • Rotary

Global Manufacturing Capacity

17 Million

Annual Unit Capacity

Supported Frequencies

50Hz, 60Hz

Model Identifier

617PK00158681-366429
