

Rotary Cultivator Ski Left Spare Part

This is a ski left spare part for rotary cultivators. It is designed to ensure optimal soil preparation and efficient cultivation.

Product Overview

Precision Rotary Cultivator Component

This left-side ski is an essential spare part engineered specifically for compatibility with rotary cultivator models including the Rx182f series. Built for durability in demanding agricultural environments, it ensures the consistent soil preparation and cultivation performance required for professional farming operations. This component helps maintain machine efficiency and minimizes operational downtime.

Technical Specifications

Comprehensive set components designed for rotary tiller maintenance and soil preparation efficiency.

Category

Agricultural Machinery Spare Parts • Soil Cultivation Components

Compatible Cultivator Series

RX162, RX164, RX180, RX182, RX182f, RX220

Application

Left-side stabilizer ski for rotary cultivators
