

Rotary Cultivator Support Disc

This support disc is designed for rotary cultivators. It ensures reliable performance and extends the lifespan of soil preparation machinery.

Product Overview

Rotary Cultivator Support Disc

This high-quality support disc serves as a critical spare part for rotary cultivators, specifically engineered for the DH226E-PRO model. Designed to withstand the rigors of agricultural soil preparation, this component ensures the longevity and smooth operation of your machinery. It provides essential structural support, enabling efficient and consistent cultivation performance in various field conditions.

Technical Details

Essential spare parts for maintaining and repairing rotary cultivators, ensuring optimal performance for the DH226E-PRO model.

Compatible Equipment	DH226E-PRO Rotary Cultivator
Component Category	Rotavator Spare Parts, Soil Preparation, Agricultural Machinery
Model Markings	W9573, S2 441

Support & Maintenance

Repair Range

- Rotary tiller components
- Variable-speed paddy field stubble-bury beater parts
- Foldable paddy field stubble-bury cultivator parts
- Paddy field ridge shaper components
