Overview

Professional Rotary Drum Mixer

This high-performance rotary drum mixer is specifically engineered for the efficient blending of plastic granules and flakes. Featuring a robust stainless steel construction, it offers a durable, easy-to-clean solution for industrial coloring and material preparation. The unit's 360-degree rotation design ensures rapid and homogenous mixing while maintaining a small footprint, making it an ideal choice for modern production facilities.

Technical Specifications

Load Capacity Rating

50 T
Capacity

Drum Material	Imported Stainless Steel
Rotation	360 Degrees
Max Mixing Time	30 minutes

Operation and Safety

Design Advantages

- Four-wheel upright design for easy mobility
- Compact footprint
- Low energy consumption
- Easy loading and unloading

Safety Features	Screen Mesh Protector, Enclosed Safety Cage
-----------------	---

Compatibility

Recommended Materials

Plastic Granules, Plastic Flakes
