

Rotary Gear Pump for Fuel Transfer

This rotary gear pump is designed for transferring gasoline and gas. It features a durable construction suitable for industrial applications and pumping systems.

Product Overview

Industrial Rotary Gear Pump

This rotary gear pump is engineered specifically for the efficient transfer of gasoline and various fuel types. Featuring a robust construction, it is built to withstand the demands of industrial applications and general machinery pumping systems. Its reliable design ensures consistent performance in critical fuel handling environments.

Technical Specifications

Build Quality

Robust Design • Industrial Grade

Series	3G Series
Primary Application	Gasoline Transfer, Fuel Pumping, Industrial Machinery
