

Rotary Hammer Drill

This rotary hammer drill is designed for heavy-duty drilling and demolition tasks. It delivers high impact energy for efficient drilling into concrete, masonry, steel, and other hard materials.

Product Overview

High-Performance Rotary Hammer Drill

This versatile 26mm rotary hammer drill is engineered for demanding drilling and demolition tasks. Featuring an 800W motor and a 3.0J impact force, it provides efficient performance across concrete, masonry, steel, and wood. Designed with user comfort in mind, it includes an ergonomic grip and auxiliary handle to reduce fatigue during extended use.

Performance Metrics

Key Performance Metrics

800 W

Input Power

3 J

Impact Force

5100 bpm

Hammer Rate

Drilling Capacity

Maximum Drilling Capacities

Material	Max Diameter
Concrete	26 mm
Masonry (Hollow Bit)	68 mm
Wood	30 mm
Steel	13 mm

Technical Specifications

Rated Speed	1150 rpm
Best Drilling Range	8 - 16 mm
Weight	2.7 kg

Features

Clamping System

SDS-PLUS

Operational Modes

Rotary Drilling, Hammer Drilling, Chiseling
