

Rotary Hammer Drill for Concrete and Masonry

This rotary hammer is designed for drilling and demolition work on concrete, masonry, and other hard materials. It features multiple operating modes including rotary hammer, hammer-only, and rotation-only, along with vibration reduction technology.

Product Overview

Professional Rotary Hammer

This high-performance rotary hammer is engineered specifically for demanding drilling and demolition tasks in concrete and masonry. Equipped with a robust 1050W motor and delivering 4.5J of impact energy, it ensures efficient material removal and precise drilling. Its balanced design and 5.5kg net weight offer the stability required for intensive professional construction and renovation projects.

Technical Specifications

Performance Metrics

1050 W Input Power	4.5 J Impact Energy	28 mm Concrete Capacity
------------------------------	-------------------------------	-----------------------------------

Speed Ratings

Metric	Value
No-load Speed (min)	800
Impact Rating (min)	3150

Electrical Requirements	220/230V-50Hz
-------------------------	---------------

Physical Properties

Weight	5.5 kg
Suitable Materials	Concrete, Masonry
