

Rotary Hand Barrel Pump

The rotary hand barrel pump is designed for dispensing liquids from barrels and drums. It is suitable for pumping oils, fuels, solvents and other non-corrosive liquids.

Overview

Industrial Rotary Hand Pump

This manual rotary hand barrel pump is engineered for efficient fluid transfer from standard 55-gallon drums and barrels. Its robust cast iron construction and steel suction tube ensure long-term durability in demanding industrial and commercial environments. The adjustable suction design makes it a versatile solution for safely dispensing various oils, fuels, and non-corrosive solvents.

Performance Specifications

Flow Rate

10 GPM
Flow Rate

Compatible Fluids

Oils, Fuels, Solvents, Non-corrosive liquids

Construction & Design

Materials

- Cast iron pump body
- Steel suction tube

Compatibility & Installation

Suction Tube

Adjustable

Standard Drum Compatibility

55-Gallon

Bung Opening Size

2 inch
