

Rotary Hand Oil Pump for Drums

This rotary hand pump is designed for transferring low viscosity fluids such as oils, fuels, and solvents. It features a cast iron body, aluminum rotor, and steel vanes for efficient pumping action.

Product Overview

Professional Rotary Hand Pump

This rotary hand pump is engineered for the efficient transfer of low-viscosity fluids, including oils, fuels, and solvents. Featuring a robust cast iron body with an aluminum rotor and steel vanes, it ensures reliable operation in demanding environments. Designed for versatility, it includes a telescoping suction tube compatible with 15, 30, and 55-gallon drums, making it an essential tool for fluid management.

Performance

Maximum Flow Rate

10 GPM

Flow Rate

Technical Specifications

Inlet Connection	1-1/2 inch NPT
Outlet Connection	3/4 inch NPT

Construction

Material Composition	Cast Iron Body, Aluminum Rotor, Steel Vanes
----------------------	---

Compatibility

Compatible Drum Sizes

- 15
- 30
- 55

Fluid Compatibility

Oils • Fuels • Solvents

Safety & Usage

Incompatible Fluids

- Corrosive fluids
- Water-based fluids
