

Rotary Hand Pump for Barrels and Drums

This rotary hand pump is designed for efficient transfer of fluids from barrels and drums. Its ergonomic handle and smooth rotary action provide ease of use and precise control over the dispensing rate.

Product Overview

Professional Rotary Hand Pump

The WS-25 rotary hand pump is a robust solution designed for the efficient transfer of fluids from standard barrels and drums. Engineered for durability in demanding environments, this pump excels in industrial, automotive, and agricultural settings. Its ergonomic handle and smooth rotary mechanism ensure precise control and ease of operation for the user.

Technical Specifications

Key Features

- Ergonomic handle for ease of use
- Smooth rotary action
- Adjustable bung adapter for versatile fit
- Curved discharge spout for convenient filling

Mechanism Type	Rotary Hand Pump
Compatible Materials	Oils, Solvents, Non-corrosive liquids

Applications

Suitable Industries

Industrial • Automotive • Agricultural
