

Rotary Indexing Table Gluing Machine

This automatic gluing machine is designed for precise and efficient adhesive application. It features a rotary indexing table with multiple workpiece holding fixtures and a dispensing nozzle.

Overview

Precision Rotary Gluing Solution

This automatic gluing machine is engineered for high-efficiency adhesive application in industrial manufacturing environments. It utilizes a rotary indexing table equipped with multiple holding fixtures to ensure consistent and precise glue distribution across workpieces. Designed for reliability, the system features pneumatic actuation and intuitive control parameters to maximize throughput and operational quality.

Technical Specifications

Machine Type	Automatic Rotary Indexing Table Gluing Machine
Key Features	Rotary Indexing Table, Pneumatic Actuation, Precision Dispensing, Multiple Workpiece Fixtures
Control System	Integrated control panel for precise parameter adjustment
