Product Overview

Rotary Self-Adhesive Labeling System

This high-speed, automatic labeling machine is engineered for superior efficiency and safety in industrial packaging lines. Featuring precision servo-motor control for both container rotation and label conveyance, it ensures consistent and accurate positioning. Its versatile design accommodates various amorphous container shapes and materials, making it an ideal choice for beverage, pharmaceutical, and cosmetic applications.

Technical Capabilities

Compatible Materials

- Plastic
- Glass
- Metal

Control Technology

- Servo Motor Control
- PLC Controller

Supported Shapes

Round, Square, Oval

Operational Features

Key Performance Metrics

1 High

Precision

1 High
