Product Overview

Professional Lifting Solution

This rotary lifting hoist frame is a versatile and robust solution designed for efficient load handling in industrial and construction environments. It features an adjustable arm and a 180-degree rotation capability, allowing for precise positioning of heavy objects. Engineered for safety and reliability, it is simple to install and provides a stable lifting point for hoists weighing between 100kg and 600kg.

Technical Specifications

Load Capacity Performance

300 kg

Capacity at 1100mm

600 kg

Capacity at 750mm

Maximum Extension	1100 mm
Max Rotation Angle	180 degree
Compatible Hoist Range	100 - 600 kg

Compliance and Quality

Certifications	GS Approved, RoHS Compliant, TUV Certified
