

Rotary Lobe Pump for Fuel Transfer

This rotary lobe pump is designed for gasoline and gas transfer applications. It features a robust construction for durability and reliable performance in demanding industrial environments.

Overview

Industrial Rotary Lobe Pump

This rotary lobe pump is specifically engineered for the safe and efficient transfer of gasoline and other volatile fuels. Its robust construction ensures durability and reliable performance even in the most demanding industrial environments. Equipped with an integrated electric motor, it provides precise flow rate control, making it an essential component for oil and gas industry applications.

Technical Specifications

Build Quality

Robust Design • Industrial Grade

Primary Application

Gasoline and Gas Transfer

Industry Suitability

Oil & Gas, Industrial Processing, Fuel Distribution

Drive System

Electric Motor
