

Rotary Lobe Pump for Fuel Transfer

This rotary lobe pump is designed for gasoline and gas transfer applications. It features a robust construction suitable for various pumping needs in the machinery and industrial parts sector.

Overview

Industrial Rotary Lobe Pump

This rotary lobe pump is engineered specifically for the efficient transfer of gasoline and various fuel types in industrial environments. Featuring a robust and durable construction, it is designed to withstand the rigors of continuous operation in machinery and industrial parts applications. Its reliable design ensures consistent performance for critical fluid handling tasks.

Technical Specifications

Construction Style

Rotary Lobe • Industrial Grade

Series

2G Series

Primary Application

Gasoline Transfer, Fuel Transfer, Industrial Machinery
