

Rotary Microtome

This rotary microtome features a hand wheel locking mechanism and allows for easy and safe paraffin block changes. An LCD screen displays sectioning data, and an emergency stop system is incorporated for safety.

Overview

Precision Rotary Microtome

This rotary microtome is designed for laboratory professionals requiring reliable and consistent sample sectioning. Featuring an integrated LCD for precise section counting and an emergency stop system, it balances safety with operational efficiency. The robust enclosure and adjustable blade holder ensure durability and precision during critical histology and pathology procedures.

Technical Performance

Section Thickness Range	1 - 25 μ m (adjustable up to >25 μ m)
Minimum Setting Value	1 μ m
Precision Error	10 %

Physical Specifications

Maximum Specimen Size	40 x 30 mm
Net Weight	21.5 kg
Dimensions (LxWxH)	380 x 340 x 270 mm

Features

Operational Highlights

- Integrated LCD section counter
- Horizontal and vertical adjustable blade holder
- Clean enclosed design
- Easy paraffin block replacement

Safety Systems	Emergency Stop, Hand Wheel Lock
