Product Overview

Professional Vibratory Tumbling

This upright vertical vibratory tumbler is designed for precision surface finishing, including polishing, grinding, and deburring of small hardware and stones. Featuring a 5LB capacity, it combines a robust motor with an efficient spring suspension system to deliver professional results with minimal operational noise. Its compact design ensures easy transport and storage, making it an ideal tool for lapidary work, jewelry making, and industrial metal finishing.

Technical Specifications

Bowl Capacity	5 LBS
Tumbler Type	Vibratory
Key Features	Variable Speed Control, Leak-proof Barrel, Timer Integrated, Low Noise Operation

Applications

Suitable Materials

- Stones and Rocks
- Small Hardware Parts
- Coins
- Jewelry Components
