

Rotary Screw Air Compressor for Industrial Use

This rotary screw air compressor is designed for industrial applications, delivering compressed air with efficiency and reliability. Its robust enclosure ensures noise reduction and protection, while advanced control systems optimize performance and monitoring.

Product Overview

Industrial Rotary Screw Air Compressor

This rotary screw air compressor is engineered specifically for demanding industrial applications, delivering a reliable and consistent supply of compressed air. Designed with efficiency in mind, the unit features a robust enclosure that provides significant noise reduction while protecting internal components from environmental factors. Integrated with advanced control systems, it ensures optimal performance monitoring and operational stability for your facility.

Technical Specifications

Primary Use

Industrial Use • Continuous Duty

Model ID

LG132A

Design Features

Rotary Screw, Industrial Grade, Noise Reduction Enclosure, Advanced Control System
