

Rotary Slasher Gearbox

This rotary slasher gearbox is designed for agricultural machinery. It efficiently transfers power at a right angle, making it suitable for rotary slasher applications.

Product Overview

GTM-AY40 Rotary Slasher Gearbox

The GTM-AY40 is a robust rotary slasher gearbox specifically engineered for agricultural machinery applications. Designed for efficient power transfer at a right angle, this unit features a durable construction with a protective red finish to withstand harsh environmental conditions. Its compact design and flanged base facilitate seamless integration into various machinery setups, while high-quality bearings and seals ensure reliable performance and extended service life.

Technical Specifications

Key Features

- Right-angle power transfer
- Flanged base for easy mounting
- High-quality internal bearings
- Precision-machined output shaft
- Durable red painted finish

Model Number	GTM-AY40
Application	Rotary Slasher, Agricultural Machinery

Performance

Maintenance Highlights

Low Friction Seals • Leak Prevention Design
